# Navelink Release Notes v1.2.2

## Service Versions

This release uses services with the following versions:

- Management portal: 0.12.1
- Identity Registry (MCP release version): 1.2.2
- Service Registry: 1.0.2

## Release Scope

### Patch from MCP

- Return null or other similar empty result instead of throwing a runtime exception.
  - This ensures that the custom event listener doesn't hang and prevent login during the setup phase.
- Remove the `McpException` class as it is not needed anymore.

## Summary

In summary, this patch includes minor backend code fixes.

## Release details

The schedule for the release is as follows:

1. Jan 16<sup>th</sup> CET, Update DEV environment to v1.2.2.
2. Jan 22<sup>nd</sup> CET, Update TEST environment to v1.2.2.
3. Confirm with customers that everything is working satisfactorily.
4. Update Operational environment to v1.2.2. The date will be published in a banner on Navelink.org.
